Interdisciplinary Innovation in Business  
and Management: **Bridging Knowledge  
Gaps for a Sustainable Future**

॥वसुधैव कुटुम्बकम्॥

**SYMBIOSIS**

**INTERNATIONAL (DEEMED UNIVERSITY)**

(Established under Section 3 of the UGC Act, 1956)

Re-accredited by NAAC with 'A++' grade | Awarded Category - I by UGC

# ABOUT OUR UNIVERSITY

Symbiosis International (Deemed University) is a multi-disciplinary university that offers its students and faculty a vibrant learning ecosystem designed around its multicultural and innovative ethos. In 1971, Prof. Dr. S.B. Mujumdar established Symbiosis as a 'home away from home' for African and Asian students, based on the principles of Vedic thought: "World as One Family." Nestled on a beautiful 300-acre campus known as the Symbiosis Knowledge Village, on the outskirts of Pune in Maharashtra, India, the university's name aptly captures the essence of the relationship with international students – a mutually beneficial bond between India and the international student community. Symbiosis is committed to fostering international understanding through the provision of quality education and is adorned with students from numerous countries engaging in various activities. It was granted "Deemed to be University" status by the Ministry of Human Resource Development in 2002.

## ABOUT SCMS PUNE

Symbiosis Centre for Management Studies, Pune embarked on its journey in 2004, and what ensued was a path of exploration, exhilaration, and engagement that has propelled us further in our relentless pursuit of perfection. Committed to achieving excellence in teaching, learning, and research from its inception, the institute grooms students into not just leaders but also individuals with a potent vision to create a global impact. SCMS, Pune, stands as a prominent institution in India within the realm of undergraduate management education. The Institute strives to develop an innovative academic environment through the synergy between faculty, students, and community.

# ABOUT RESEARCH CONCLAVE

In today's globalized world, research plays a crucial role in academic development; knowledge-driven growth founded on innovation is indispensable. The fundamental premise of research is the pursuit of knowledge. Engaging in research while studying has a profound impact on students' growth and development. From fostering a problem-solving mindset to unlocking more career opportunities, students will derive multiple benefits from this research.

# BENEFITS:

- Fostering critical thinking and analytical skills through hands-on learning
- Defining academic, career, and personal interests
- Enhancing proficiency and insight within a chosen discipline beyond the traditional classroom context
- Developing one-on-one connections and establishing a cohesive network in the respective fields.
- Building community with peers, faculty, and organizations
- Encouraging Holistic Development

The process of research confers benefits upon the well-being of both individual researchers and society as a whole. Moreover, the recently enacted Anusandhan National Research Foundation Bill 2023, by the Indian Government, aims to furnish a high-level strategic direction for research, innovation, and entrepreneurship across domains. This legislative action is poised to facilitate collaborations among businesses, academia, government agencies, and research institutions. Against this backdrop, SCMS, Pune, is organizing a research conclave encompassing students from diverse disciplines. The conclave, titled **"Interdisciplinary Innovation in Business and Management: Bridging Knowledge Gaps for a Sustainable Future,"** serves as a platform for students to showcase their research papers on an international scale. Students are encouraged to collaborate with their mentors or faculty members, with the stipulation that **the primary author of the research paper must be a student.**

---

# THEME OF THE CONCLAVE

---

The field of business and management is undergoing a significant shift in today's rapidly changing and interconnected global economy. Traditional information silos are proving inadequate to address the intricate web of challenges confronting businesses and industries as these challenges become increasingly sophisticated and diverse. The concept of "Interdisciplinary Innovation in Business and Management" emerges as a beacon of progress and a catalyst for change within this dynamic framework.

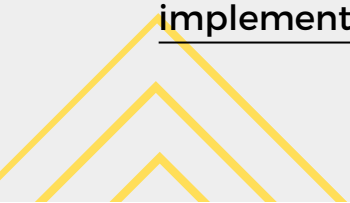

Interdisciplinary innovation involves surmounting the barriers that have traditionally constrained business and management processes, and integrating a multitude of perspectives, approaches, and experiences from other sectors. This approach acknowledges that the problems we encounter, whether related to social well-being, ethical decision-making, technological disruption, or environmental sustainability, are often intricate and interrelated. Hence, adopting a comprehensive and collaborative approach is imperative, not only for comprehending these issues, but also for formulating and implementing effective solutions that contribute to a sustainable future.

The phrase "**bridging knowledge gaps**" has fundamental relevance in this context. It represents the vital work of integrating knowledge from several fields, including economics, psychology, environmental science, technology, and sociology. By doing this, we may reveal blind spots, get over cognitive constraints, and promote a thorough comprehension of the complex mechanics underlying the current business landscape.

To pave the way toward a sustainable future is the ultimate objective of transdisciplinary innovation in business and management. In this perspective, sustainability includes social equality, economic viability, and environmental care. Organizations may create novel strategies that not only improve their own performance but also have a beneficial impact on the larger ecosystem in which they operate by combining information, tactics, and best practices from several sectors.

In this investigation of multidisciplinary innovation in business and management, we look into the guiding ideas, practices, and practical implementations of this paradigm-shifting strategy.

---

### **Track 1: Sustainable Development and New Dimensions in Entrepreneurship & Business Ethics**

1. Corporate Governance & CSR
2. Human values in the current scenario
3. Management ethics for 2030
4. Social responsibility in International Business
